

K-Love provides quality listening music and commentary that encourages my family daily. Being in a remote location in Nebraska that does not receive a lot of transmissions, we would be cut off from receiving the type of broadcasting that we feel is uplifting and beneficial to our community. This type of broadcasting provides resources and information that allows the community to be aware of current events and family living resources that would otherwise not be provided through other radio stations. Please do not allow this LPFM signal to be expanded and interrupt the FM translators that broadcast K-Love's signal. Thank you.
